

The Data Services team is keen to ensure that the information we hold about churches is as accurate as possible.

If you have noticed that Statistics for Mission (attendance and participation) information or Return of Parish Finance information for previous years is incorrect or missing for your parish/church, please provide this information using the relevant form below (data are usually collected via the Data Services Unit's [Online Parish Returns System](#)). Please only complete those questions for which you believe the information needs to be updated - there is no need to fill in the whole form to correct a few erroneous numbers.

[Statistics For Mission corrections \(word document\)](#)

[Return of Parish Finance corrections \(excel document\)](#)

If you wish to amend your church's information for more than one year, please complete a separate form for each year.
