

How to control cacheing using browser controls.

Most web browsers automatically clear cache when you exit a browser, however sometimes we need to do it manually. Please follow the below steps to clear your cache:

## Google Chrome

1. Click on the chrome menu.
2. Select the **three dots**.
3. Click **settings** at the bottom of the drop down.
4. Under the Security and Privacy section click the **Clear browsing data** button
5. In the pop up section you are able to select Cached images and files. Make sure it is ticked and then click **Clear data**.

## Microsoft Edge

1. Click on the chrome menu.
2. Select the **three dots**.
3. Click **settings** at the bottom of the drop down.
4. Click the **Privacy, search, and services** section
5. Under the **Clear browsing data** section click the **Choose what to clear button** next to **Clear browsing data now**.
6. You will need **Cached images and files** to be selected, then click **clear now**.

## Mozilla Firefox

1. Select **Options, the three lines** in the top right of the browser.
2. Click the **Privacy & Security** tab.
3. Scroll down to Cookies and Site Data and click **Clear data**.
4. Ensure only **Cached Web Content** is selected and click **Clear**.

## Safari

1. Click on the **Safari** menu in the top left of the window.

2. Select **Preferences**.
  3. Navigate to **Advanced** (the furthest right at the top) and at the bottom tick the box that says "**Show develop bar in menu bar**". Now close Preferences.
  4. Access the Develop menu from the menu bar and select **Empty Caches**.
