

The Cathedral and Church Buildings Division of the Church of England would like to hear from a wide range of Volunteer Professional Advisors who are specialists in Building Services, Sustainability and the Environment to assist Diocesan Advisory Committees around the country.

There is no limit to the types of specialisms required but suggested areas of interest could include low-carbon heating, energy-efficient lighting, solar panels, electrical systems, insulating historic buildings, EV car charging, ecology and biodiversity, and climate resilience.

To find our further information and to register your interest, please view our application below
