

RITRANSPARENCY REPORT 2019

Church Commissioners for England

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

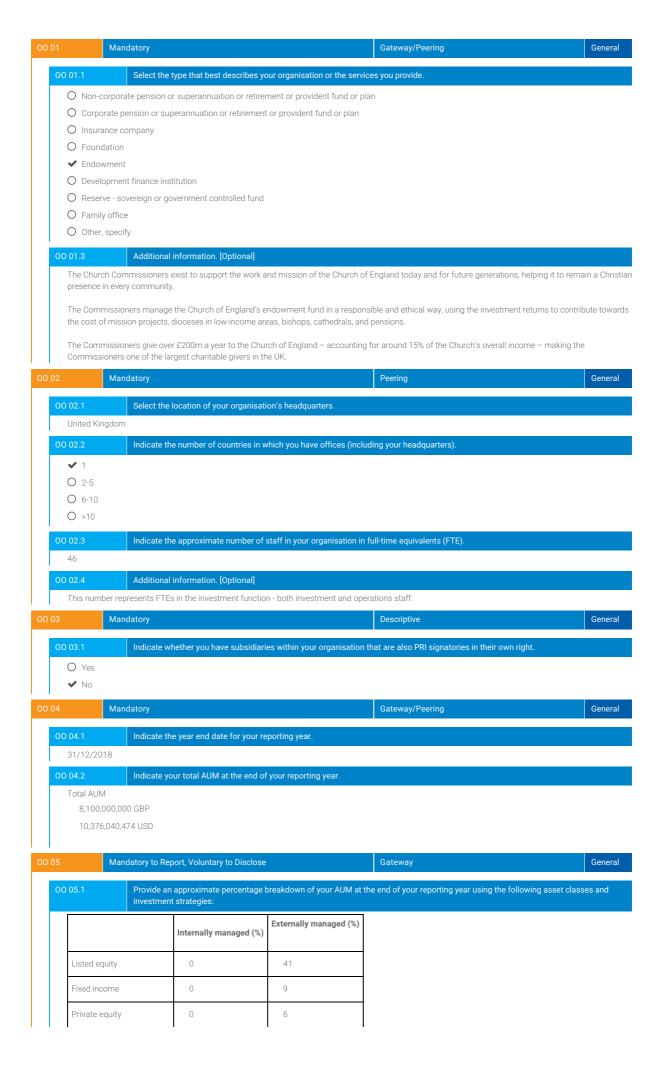

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

SG 01.4

Climate change

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The Church Commissioners' overarching investment objectives are to:

• manage the fund to ensure sustainable distributions for our beneficiaries

lacksquare Understanding and incorporating client / beneficiary sustainability preferences

- achieve a total return of RPI +5% per annum measured over the long term
- meet performance benchmarks for individual asset classes
- manage financial risks appropriately

Other RI considerations, specify (1)Other RI considerations, specify (2)

• act within our responsible investment guidelines

The Commissioners' investment policy is to hold a diversified portfolio of investments across a broad range of asset classes consistent with our ethical guidelines.

Two key documents govern the Church Commissioners' ethical and responsible investment policy:

- A Statement of Ethical Investment Policy setting out the exclusions we apply, our ethical expectations of companies in which we invest and our commitment to engagement.
- A Responsible Investment (RI) Framework setting out our RI commitments for our internally managed assets and our RI expectations of our managers for our externally managed assets.

We have individual ethical policies covering a large number of environmental, social & governance issues from a screening, engagement and/or voting perspective.

This makes for a comprehensive framework through which we invest for the long-term as a perpetual endowment, seek to avoid negative impact and enhance positive impact from our investments, and seek to incorporate material ESG issues into investment practice.

SG 01.5 Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Our motivations for pursuing Responsible Investment are both ethical and financial $\ensuremath{\mathsf{I}}$

Ethical Investment

The Church Commissioners' Statement of Ethical Investment Policy sets out our belief that the way in which we invest forms an integral part of the Church of England's witness and mission. It acknowledges our stewardship responsibilities on behalf of our beneficiaries, and states our commitment to the UK Stewardship Code, PRI and the incorporation of ESG issues into our investment decisions and active ownership.

The policy explains that we incorporate ethical exclusions because we do not wish directly to profit from, or provide capital to, activities that are materially inconsistent with Christian values, and are mindful of the danger of undermining the credibility, effectiveness and unity of the Church's witness were we to do so. The policy explains that we conduct engagement activities because we wish companies in which we invest to manifest

9

sustainable environmental practice, fair treatment of customers and suppliers, responsible employment practices, conscientiousness with regard to human rights, sensitivity towards the communities in which they operate and best corporate governance practice.

The policy sets out the governance arrangements for ethical investment policy - that the Commissioners receive advice on ethical investment from the Church's Ethical Investment Advisory Group (EIAG) but that legal responsibility for investment decisions rests solely with the Commissioners. Ethical investment policies are adopted by the Commissioners' Board of Governors.

The Commissioners have had an ethical policy since our foundation in 1948. The policy is constantly refreshed and updated. The Statement of Ethical Investment Policy was last amended in 2018. We are committed to an ethical approach across the entirety of our fund but this cannot be done in just one way across such a large and diversified portfolio. We follow asset class/strategy-specific policy guidance on how to integrate ethical considerations in property, hedge funds and pooled funds. We have issue specific policies covering climate change, extractive industries, defence, non-military firearms, gambling, alcohol, pornography, high interest rate lending, genetic modification, executive remuneration and corporate tax.

Responsible Investment

The Commissioners' Responsible Investment (RI) Framework states that the Church Commissioners believe that taking account of ESG issues is an intrinsic part of being a good investor and that we hold this belief for both ethical and financial reasons. Ethically, we think that investors who take account of ESG issues will be better aligned with the broader objectives of society and better corporate citizens. Financially, our experience is that when ESG issues are well managed they can have a good impact on the performance of investments, particularly over the longer term. The Framework states our commitment to the incorporation of material ESG issues into investment analysis and decision-making across all asset classes

The Framework sets out RI commitments for internally managed assets and RI expectations of managers for externally managed assets. The Framework includes a manager rating system which enables us to categorise managers or prospective managers according the quality of their RI practices. It also sets out a wide range of indicative ESG issues - from climate change to human rights to diversity - which we expect to incorporate or see incorporated into investment analysis and active ownership when they are material.

The Framework makes clear that adherence to, and implementation of, the Framework is everyone's responsibility in the investment function and that individual investment teams lead on ESG incorporation and active ownership for the area of investments for which they are responsible. The role of the Head of Responsible Investment is to support, monitor and communicate implementation of this policy.

The Framework was approved at trustee level by the Commissioners' Assets Committee in July 2015 and last considered by the Assets Committee at the annual update on RI progress in November 2018.

Climate change and public policy

The Church Commissioners' Board of Governors adopted a new, comprehensive climate change policy in 2015, incorporating exclusions of companies focused on the highest carbon fossil fuels, low carbon investment, engagement with companies and engagement with public policy.

Our public policy objective on climate change is to promote a fair and stable regulatory and structural environment, nationally and internationally, that supports the transition to a low carbon economy, including through greenhouse gas emissions reductions, adaptation to the physical impacts of climate change, appropriate protection for the natural environment, and just and affordable access to energy for the poor. Our public policy engagement on climate change is normally done collaboratively through IIGCC and UKSIF.

In the UK, as the largest investing body of the national church, we also seek actively to input to broader public policy on ESG issues, responding for example to Financial Reporting Council consultations on the Corporate Governance Code and Stewardship Code. We advocate policy that will promote ethical outcomes for society and a sustainable economy, both of which we believe are in the long-term interests of investors.

O No

SG 01 CC Voluntary Descriptive Genera

SG 01.6 CC

Indicate the climate-related risks and opportunities that have been identified and factored into the investment strategies and products, within the organisation's investment time horizon.

The principal climate-related risk for the Commissioners is transition risk - the risk that our asset allocation, our asset managers or individual investment assets will be poorly positioned for the investment risks and opportunities associated with the transition to a low carbon economy.

The other risk is physical risk – the risk that our assets are impacted by the physical risks associated with climate change, such as flooding, fire and extreme weather events, particularly our property, rural and forest assets.

We face significant uncertainties around the direction of public policy, developments in technology and its uptake, and the nature and severity of the physical impacts of climate change. The most significant challenge for investment decision-making is that global public policy is not aligned with the target of the Paris Agreement to restrict the global average temperature rise to well below 2 degrees Celsius. Although it is intended that governments will ratchet up their commitments to emissions reduction - their 'Nationally Determined Contributions' - it is not clear that governments will do this, or will do so in time. Governments may also not live up to, or may renege upon, the commitments they have made.

In the long term the biggest risk to the Commissioners is that the global average temperature rise is not restricted to well below 2 degrees Celsius causing economic damage that it will not be possible to avoid via asset allocation or investment selection.

SG 01.7 CC

Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

SG 01.8 CC

Indicate the associated timescales linked to these risks and opportunitie

The Mercer study 'Investing in a Time of Climate Change' in which we participated in 2015 focused on the period 2015-2050 and modelled the risks and opportunities associated with 2, 3 and 4 degree climate scenarios through to 2050.

The study concluded that prior to 2050 transition risks and opportunities are more apparent than physical risks, and that they vary principally according to the strength of public policy on the mitigation of climate change. The study concluded that the physical impacts of climate change become most apparent post 2050.

Mercer are, however, currently updating their analysis taking account of developments since 2015, including in climate science, and we are conscious that their conclusions may change.

O No

SG 01.9 CC Indicate whether the organisation publicly supports the TCFD?

✓ Yes

SG 02.	3 Addit	ional information [Optional].

It is quite hard to fit our policy suite neatly into the categories above.

Our overall approach is covered in two policies - our Statement of Ethical Investment Policy and our RI Framework. The latter url is given in the screening category, the former in the overall approach category.

We have two published policies on environmental issues. The key policy - our climate change policy - is signposted with the url. The wider Environmental Statement is attached. Our policy on GMOs is also attached.

As Church investors we have a large number of policy positions on social issues. The one policy dedicated entirely to social issues that is not a sector-specific policy is our supply chain engagement framework and this is signposted with the url. Our policies on high interest rate lending, non-military firearms and pornography are attached.

In the area of corporate governance, we have policies on executive remuneration (signposted with the url) and corporate taxation (attached).

We discuss how we see ethical investment as part of our fiduciary responsibilities in our Statement of Ethical Investment Policy.

We have a large number of sector specific policies, which set out ethical investment exclusions where these are part of our approach. The url is given for our newest sector specific policy, on the extractive industries. Other policies are included as attachments, covering alcohol, defence and gambling.

Our exclusions are summarised in the annex to our Statement of Ethical Investment Policy

On engagement, we have a Business and Engagement Policy.

Our proxy voting guidelines - a summary of our full template - are published on the Church Investors Group website on the url given as we operate a common voting policy with the other main church investing bodies in the UK.

We discuss how we see ethical investment as part of our relationship with beneficiaries and the wider Church in our Statement of Ethical Investment Policy.

We have sign-posted our RI Framework for information on ESG in investment policy and in relation to our time horizon but information on our investment strategy and objectives can also found in our annual report: https://www.churchofengland.org/sites/default/files/2018-

05/Church%20Commissioners%20Annual%20Report%202017.pdf. We are not a pension fund, so do not have a Statement of Investment Principles.

Mandatory Core Assessed Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process ✓ Yes Describe your policy on managing potential conflicts of interest in the investment process The Commissioners' Code of Conduct for trustees includes a conflict of interest policy consistent with Charity Commission guidance and the Seven Principles of Public Life set out by the UK's Committee on Standards in Public Life. There are extensive provisions in the Code "to avoid any danger of members being influenced, or appearing to be influenced, by their private interests (or the interests of those persons or bodies they are closely connected with) in the exercise of their duties as a member". These include a register of interests, the declaration and recording of any interests relating to individual items under discussion at meetings, and withdrawal from meetings in cases of relevant pecuniary interest. Conflicts of loyalty are also covered and there are rules on gifts and hospitality. Staff are subject to a compliance policy part of which covers conflicts of interest or loyalty. Staff are prohibited from making recommendations or effecting transactions for the Commissioners if they have directly or indirectly a material interest of any description in the recommendation or transaction. Personal dealing by investments staff and connected persons is subject to prior approval by the Commissioners' Compliance Officer and there are rules on gifts and hospitality. O No Private Gateway/Core Assessed General Indicate if and how frequently your organisation sets and reviews objectives for its responsible investment activities. ✓ Ouarterly or more frequently O Biannually O Annually O Less frequently than annually

Additional information. [Optional]

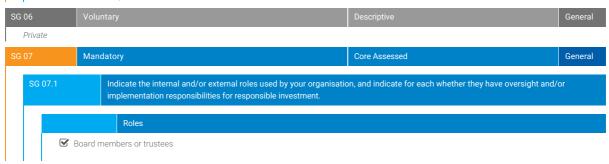

O Ad-hoc basis O It is not set/reviewed

The objectives and nature of the Commissioners' ethical and responsible investment activities are subject to robust governance and regular trustee and management review

The Commissioners' Assets Committee conducts separate annual reviews of the implementation of our Responsible Investment Framework, Pooled Funds Policy and Engagement and Voting programme. Additional reporting is provided for the Assets Committee guarterly on the implementation of the Pooled Funds Policy and biannually on the Engagement and Voting programme. Quarterly updates on Responsible Investment activities and progress are provided

The work of the Ethical Investment Advisory Group (EIAG) is governed by a work plan agreed on a rolling basis by the EIAG and Church of England National Investing Bodies, with quarterly review at CEO level and monthly review at working level. Collaborative activities on ethical investment undertaken by the National Investing Bodies are also subject to quarterly review at CEO level and monthly review at working level.

Annual RI objectives are agreed for all of the Commissioners' RI staff. Performance against these objectives is formally reviewed half way through the year and at the end of the year

The Head of RI won the ICGN Global Stewardship Champion Award 2018. ☐ Investor Group on Climate Change, Australia/New Zealand (IGCC) ☐ International Integrated Reporting Council (IIRC) ☑ Investor Network on Climate Risk (INCR)/CERES Your organisation's role in the initiative during the reporting period (see definitions) Advanced The Commissioners work intensively with CERES as Climate Action 100+ co-leads for ExxonMobil's. ☐ Local Authority Pension Fund Forum ☐ Principles for Sustainable Insurance 🗹 Regional or National Social Investment Forums (e.g. UKSIF, Eurosif, ASRIA, RIAA), specify Your organisation's role in the initiative during the reporting period (see definitions) Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] The Commissioners' Head of Responsible Investment sits on UKSIF's Policy Committee and contributes actively to the development of UKSIF's public policy positions. ☐ Responsible Finance Principles in Inclusive Finance ☑ Shareholder Association for Research and Education (Share) Your organisation's role in the initiative during the reporting period (see definitions) Basic Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] SHARE are partners of the Church Investors Group and co-leads for Exxon in ClimateAction 100+ ☐ United Nations Environmental Program Finance Initiative (UNEP FI) United Nations Global Compact ☑ Other collaborative organisation/initiative, specify Church Investors Group Your organisation's role in the initiative during the reporting year (see definitions) Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] The Commissioners' senior stewardship analyst is a board member of the Church Investors Group and the Commissioners are actively involved in all of the CIG's activities ☑ Other collaborative organisation/initiative, specify Mercer Future Makers Working Group Your organisation's role in the initiative during the reporting year (see definitions)

Moderate The Commissioners were active partners for the Mercer study 'Investing in a time of Climate Change' which reported in 2015 and are active participants in the follow-up 'Future Makers Working Group' co-ordinated by Mercer which shares climate change best practice. A meeting of the group was held in San Francisco in conjunction with PRI in Person. The Commissioners' Head of RI has reviewed materials for a forthcoming update to the 2015 study. ✓ Other collaborative organisation/initiative, specify Transition Pathway Initiative Your organisation's role in the initiative during the reporting year (see definitions) Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] The Transition Pathway Initiative (TPI) is a joint initiative of the Church of England Pensions Board, Church Commissioners and Environment Agency Pension Fund. The Church Commissioners sit on the steering committee and technical advisory group, and have actively helped grow the initiative's supporter base ☑ Other collaborative organisation/initiative, specify Climate Action 100+ Your organisation's role in the initiative during the reporting year (see definitions) Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] The Commissioners lead two high profile Climate Action 100+ engagements and are high profile advocates of the initiative in the media and within the investment community Mandatory to Report, Voluntary to Disclose PRI 1 Descriptive Private Mandatory Core Assessed SG 10.1 Indicate if your organisation promotes responsible investment, independently of collaborative initiatives. ✓ Yes SG 10.2 Indicate the actions your organisation has taken to promote responsible investment independently of collaborative initiatives. Provide a description of your role in contributing to the objectives of the selected action and the typical frequency of your participation/contribution. 🗹 Provided or supported education or training programmes (this includes peer to peer RI support) Your education or training may be for clients, investment managers, actuaries, broker/dealers, investment consultants, legal advisers etc.) The Church Commissioners provide frequent peer to peer RI support and are regularly approached by asset owners, asset managers and service providers to discuss RI. We are active members of the informal UK pension fund RI round table which provides peer support on RI for UK pension funds. Similarly we provide peer to peer support on RI through the Church Investors Group for smaller church investors. Increasingly the CIG and the Commissioners individually are involved in supporting ex-UK church investors. The Commissioners' Head of Responsible Investment sits on the University of Oxford SRI Review Committee. Description

The Commissioners are major funders of the Transition Pathway Initiative which we co-founded. This is generating new research into the alignment of companies' long-term future carbon emissions with the Paris Agreement's 2 degree goal and the Nationally Determined Contributions of signatory governments, as well as a ready reckoner on companies' management quality on climate change. The research and analysis is all available free of charge on the TPI website.

	⋖	Initial	assessment			

Describe

In 2015, Mercer analysed our full portfolio against climate scenarios modelling the investment impacts of a global average temperature rise of two, three and four degrees Celsius by 2100. This supported initial assessment of the robustness of our portfolio in a range of climate scenarios, including a 2 degrees scenario.

In 2016, the 2 Degrees Investing Initiative analysed our listed equity portfolio against a 2 degree scenario for high carbon sectors. This helped further raise our initial awareness of the extent of climate risk in high carbon sectors.

☑ Incorporation into investment analysis

Describe

Mercer's climate scenario analysis found that the Commissioners' strategy of portfolio diversification was supportive of resilience in all four climate scenarios, including the two degrees scenario. In such a 'Transformation' scenario aligned with the goal of the Paris Agreement, the Commissioners' investments in developed market equities (including UK equities) were expected to be negatively impacted by a rapid transformation of the economy, but this was offset considerably by the positive expected impact on returns for emerging market equities, property, timber and infrastructure. In the time since the analysis was conducted in 2015, the Commissioners have increased our exposure to assets that are not expected to be sensitive to the risks posed by climate change including multi-asset strategies.

☑ Inform active ownership

Describe

Mercer's scenario analysis, and that of the 2 Degree Investing Initiative, highlighted sectors particularly exposed to climate risk. Since 2015/16 we have drilled down deeper into sector risks through the Transition Pathway Initiative (TPI), which the Church of England National Investing Bodies cofounded with the Environment Agency Pension Fund and the Grantham Research Institute at the London School of Economics. TPI analyses the management quality and future carbon performance of companies in high risk sectors including oil and gas, mining, electricity utilities, cement, iron and steel, aviation and autos. We use TPI to identify targets and issues for our climate-related active ownership (both engagement and voting). We are also very active supporters of and participants in Climate Action 100+, the collaborative engagement project backed by investors with over \$32 trillion in assets focused on the world's most systemically important listed carbon emitters in the sectors most exposed to climate risk.

SG 13.6 CC

Indicate whether the organisation has evaluated the impacts of climate-related risk, beyond the investment time-horizon, on the

✓ Yes

Describe

Climate scenario analysis inevitably involves consideration of risk in a much longer time horizon than the normal investment time horizon. Mercer's 2015 study particularly highlighted the Commissioners' exposure to disruptive climate risk post-2050 and encouraged an urgent approach to policy and corporate engagement today to mitigate these risks. Scenario analysis also reinforced the long-term case for the Commissioners' real assets holdings in timberland which are expected to perform very well in a 2 degrees scenario and to be one of the most resilient asset classes in a 3 degrees scenario.

O No

SG 13.7 CC

Indicate whether a range of climate scenarios is use

- ✓ Yes, including analysis based on a 2°C or lower scenario
- O Yes, not including analysis based on a 2°C or lower scenario
- O No, a range is not used

Brief description and measures of investment

The Commissioners have a £426.3m equities portfolio managed by a specialist asset manager with a long term investment approach integrating sustainability factors directly into the investment process.

O No General Descriptive Describe how you address ESG issues for internally managed assets for which a specific PRI asset class module has yet to be developed SG 16.1 or for which you are not required to report because your assets are below the minimum threshold. Asset Class Describe what processes are in place and the outputs or outcomes achieved Our internally managed farmland is all in the UK. We employ agents to manage the portfolio within a policy framework set by the Commissioners. Within tenancy agreements it is generally stipulated that tenants must farm the land in accordance with good practice. This will in most cases reflect the principles of good conservation and environmental practice. Many tenants have entered Environmental Stewardship Schemes. Advice is available from our agents for tenants wishing to consider environmentally sensitive farming practices. Estates are visited by our agents at least monthly. They consult with us if any tenants are experiencing difficulties including financial Farmland hardship. Animal welfare is taken seriously and any perceived issues are addressed by agents in conjunction with the Commissioners. Quarterly meetings are held with our agents who provide comprehensive management reports. The reports provide regular updates on Health and Safety measures that have been or are being taken on estates. A strategic review of the rural portfolio was carried out in 2014. Flooding risk was a factor in the decision to alter the management outcomes on a number of estates. We have a framework agreement with a developer for solar power generation on the rural estate and 9MW installed capacity. Cash Ethical considerations are an intrinsic part of the selection process for the Commissioners' banking services provider. Strategic land Strategic land is rural land in the UK for which the Commissioners seek planning permission for development, typically for housing. Social issues are prominent in strategic land. Issues include community consultation, relations with local councils, communication with strategic land tenants and negotiation of Section 106 agreements, including with regard to affordable housing. It is not the Other (1) [as general practice of the Commissioners to promote development if the local authority is not supportive, in the way that some defined in housebuilders might. As long term investors, the Commissioners prefer to work with development plans and wait for land to feature in Organisationa councils' plans, which the team would then support through the making of representations. Overview module] The Commissioners make sure that they are always present at community consultation events. There is a strong regulatory framework for environmental issues relevant to housebuilding in the UK, from requirements for environmental impact assessments and assessment of flood risk to building regulations and stipulations for energy performance. Land is assessed for flood risk before the Commissioners acquire it, including taking into account risks posed by climate change. Mandatory Descriptive General Describe how you address ESG issues for externally managed assets for which a specific PRI asset class module has yet to be developed or for which you are not required to report because your assets are below the minimum threshold. Asset Describe what processes are in place and the outputs or outcomes achieved Class Fixed Managers are assessed using our manager ratings system under our Responsible Investment Framework. income -Securitised Select whether you use the PRI Hedge Fund DDQ Hedge funds -O Yes סממ ✓ No All hedge fund investments are subject to our hedge funds policy which requires robust analysis of both strategies and firms for potential ethical and ESG concerns. This analysis is reported to trustees as part of the appointment process. Investments are also Hedge subject to our pooled funds policy. Finally managers are assessed using our manager ratings system under our Responsible funds Investment Framework, We continue to use our hedge funds policy diligence system and RLDDO rather than the PRI Hedge Fund DDO because our diligence system is more detailed and tailored to our specific ethical and RI needs. All our UK and US forestry is sustainably certified to either FSC or SFI standards. The sandalwood plantation in Australia in which we Forestry invest is managed in accordance with an ISO 14001 environmental management system. Genera ✓ Yes SG 18.2 The Commissioners have consistently been involved in innovative RI initiatives and practices.

27 TRANSPARENCY

• The Aiming for A engagement on climate change with the 10 largest UK-listed extractives and utilities companies modelled a new kind of

- institutional investor active stewardship involving attendance at AGMs and filing stretching shareholder resolutions. This approach to climate engagement is now embedded into the IIGCC corporate group and Climate Action 100+ both of which we are active participants in.
- The ExxonMobil climate scenario analysis resolution achieved an unprecedented demonstration of investor support for climate risk reporting.
 The resolution was passed with 62% support at Exxon's 2017 shareholders' meeting an unparalleled vote at an oil and gas supermajor on a contested ESG resolution.
- The Transition Pathway Initiative is a new, industry leading, assessment framework to track companies' alignment with the transition to a low carbon economy in high carbon sectors, developed and operated in a partnership with the Grantham Institute at the London School of Economics. The tool has been made available for free on the internet for any investor to use.
- The Mining and Faith Reflections Initiative is the result of a group of mining company CEOs reaching out to the Catholic, Anglican and Methodist Churches for an honest and open dialogue about the social licence to operate of their sector. This is a high level and different style of engagement that enables issues to be raised in a forum that contrasts from normal engagement outreach. So far, the initiative has involved high level dialogues with the CEOs at the Vatican and Lambeth Palace. The dialogue is intended to provide a forum for difficult issues to be raised and addressed with companies.
- We have developed a new approach to ethical screening in the alcohol sector which involves excluding companies not on the basis of revenues derived from alcohol but the extent to which companies market and retail alcohol responsibly. This is much more faithful to the Church of England's ethical view of alcohol we are opposed not to alcohol per se but to corporate complicity in its misuse and formed the basis of engagement with UK-listed alcohol producers and retailers that led to important policy changes at major companies. We are now extending our assessment and engagement process beyond the UK to take in the world's largest listed global alcohol producers.
- We have developed a detailed policy on ethical investment in hedge funds on a strategy by strategy basis which, from our contacts with other investors, including through PRI, we believe is industry leading.
- We have developed a detailed policy on ethical investment in pooled funds which, from our contacts with other investors, we believe is industry leading.

		class Scope and		focus	sed on utili	ties. During manager selectio	n, we s	ought	increa	sed assuranc	e that the r	nanager wo	ould
		process	incorporate clim	nate cl	nange con	siderations into investment de	ecision	ıs, parti	icularly	with regard	to electricit	y utilities.	

At our request, the manager became a supporter of the Transition Pathway Initiative, which assesses the management quality of electricity utilities on climate change their future carbon performance. The manager also agreed to provide regular carbon footprint reporting, which it has started to provide, and which indicates a declining carbon footprint trend.

☑ Add Example 2

Topic or issue	Incorporation of ESG and climate change considerations into investment decisions.
Conducted by	Internal staff
Asset class	Infrastructure
Scope and process	This manager is focused on infrastructure supporting energy production and distribution. During manager appointment, we sought increased assurance that the manager would incorporate ESG and climate change considerations into investment decisions.
Outcomes	Strong ESG provisions were incorporated into our side letter, as well as the requirements of our Energy Infrastructure Investment Framework, which addresses how we expect our energy infrastructure infrastructure investments to align with the transition to a low carbon economy. The manager has provided its first detailed annual ESG report and sought feedback, which we have provided.

☑ Add Example 3

Topic or issue	Incorporating investment exclusions.
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	This is a leading global asset manager on a positive trend on Responsible Investment. Our investment is in a long/short equity pooled fund. During manager monitoring we have consistently asked for a solution to be found so that our investment exclusions were respected. We made clear that this was a requirement, not a nice to have.
Outcomes	In 2018, the manager agreed to create a new version of the strategy in which we were invested incorporating our investment exclusion categories. This SRI share class would be made generally available to other investors as well as the Church Commissioners.

🗹 Add Example 4

Topic or issue	Engagement with Responsible Investment.
Conducted by	Internal staff
Asset class	All asset classes
Scope and process	This manager is a leading global hedge fund manager. During manager monitoring we have consistently encouraged the manager to deepen their engagement with Responsible Investment and to consider further the materiality of ESG issues for their investment strategy across the range of asset classes they invest in.
Outcomes	The manager reported significant developments in its engagement with Responsible Investment in 2018, including the establishment of a cross-departmental working group on Responsible Investment and consideration of impact investment, and whether there might be a role for the manager in offering positive impact strategies.

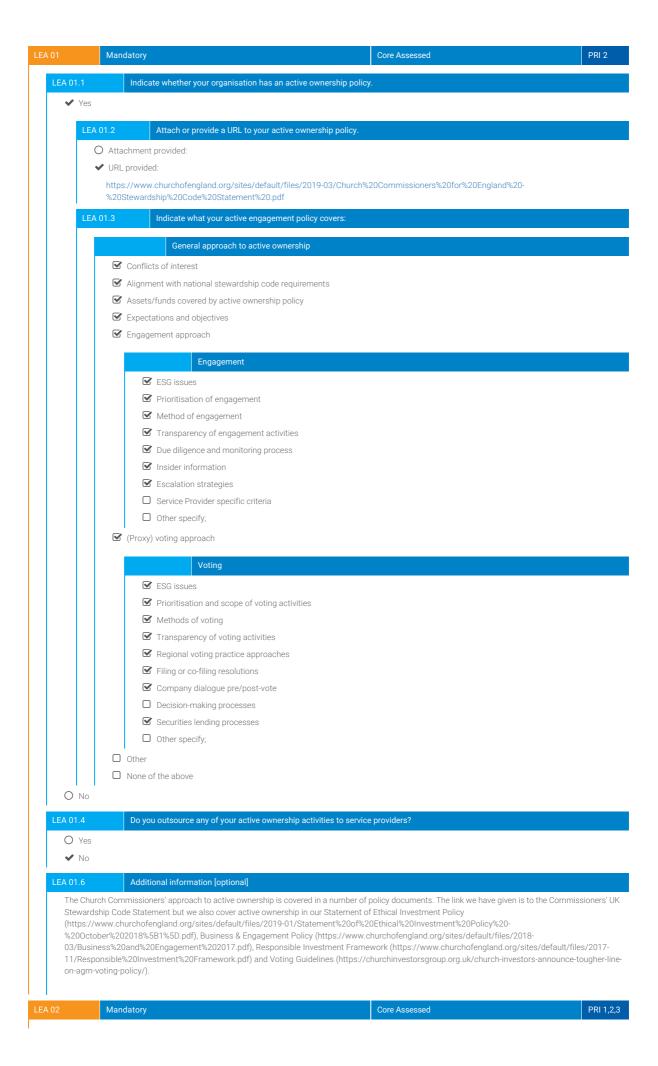

Add Example 5

Topic or issue	Incorporation of ESG and engagement with Responsible Investment.
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	This manager is a leading global defensive equity manager. During manager monitoring we have consistently encouraged the manager to consider further the materiality of ESG issues for their investment strategy and to deepen their engagement with Responsible Investment. The manager has already established, at our request, a SRI share class of the strategy in which we are invested which incorporates all our investment exclusions. Another asset owner has joined us an in investor in the strategy so that its investment exclusions are also respected.
Outcomes	In 2018 the manager trialled third party ESG data as part of its exploration of the potential materiality of ESG factors for its strategy. In addition, at our request, the manager participated in a PRI strategy group on ESG in long/short equity strategies as part of the PRI hedge funds work stream. This manager was one of a number of our managers with sophisticated investment strategies under consideration by the PRI hedge funds work stream that participated in strategy groups at our request, even though they were not PRI signatories.

LEA 03.3 Additional information. [Optional]

The main determinant of our engagement priorities is our ethical investment policies. These policies are adopted by the Church of England National Investing Bodies (NIBs) following advice from the Church of England Ethical Investment Advisory Group (EIAG). Many of our policies require engagement as a key element of implementation including in particular our alcohol, climate change, corporate tax and extractive industries policies.

We also take account of the views, concerns and priorities of beneficiaries and stakeholders, particularly as represented in the Church of England General Synod.

The Church Commissioners' Assets Committee agrees an annual engagement plan every year based on advice from the Commissioners' Responsible Investment team which takes into account the factors indicated above.

We take care to align voting and engagement and to engage with priority companies when we vote against management.

We are strong believers in the power of collaborative engagement particularly on issues where we are seeking a meaningful shift in companies' approach (especially climate change) or engaging to represent ecumenically shared church values.

We recognise the need to retain flexibility in our allocation of engagement resource as issues arise in the course of the year.

LEA 04.2 Additional information. [Optional]

All of the Commissioners' engagement programmes have clear purposes agreed with trustees and we maintain a database and monitoring system to track engagement progress.

When engaging on Church-specific programmes we establish our own engagement frameworks. For example, for our alcohol engagement programme we have established minimum standards of responsible practice for alcohol marketing and retailing that we require companies to pass if they are to be investable.

In collaborative engagements, we work to common agreed frameworks and objectives, for example those of the PRI corporate tax programme or Climate Action 100+

We also incorporate commonly accepted standards into our engagement programmes and objectives, for example those of the Hampton Alexander Review into our voting and engagement on gender diversity on the boards of UK companies.

On climate change, we have put considerable resource into developing a new framework to support objectively measured engagement. The Transition Pathway Initiative (TPI) was developed by the Church of England National Investing Bodies in partnership with the Environment Agency Pension Fund, Grantham Research Institute at the London School of Ecoomics, FTSE Russell and a coalition of other asset owners. TPI assesses companies' alignment with the transition to a low carbon economy, looking at both their quality of management of climate change issues and their projected future carbon emissions, plotted against the emissions reductions required by the Paris Agreement. The assessments are publicly available, free of charge, on the TPI website. In 2018 TPI became one of the official benchmarking partners of Climate Action 100+. The Church Commissioners use TPI to set clear performance standards for companies on climate change that form our engagement objectives.

LEA 05.3 Additional information [Optional]

In individual engagements we monitor and review engagement progress against the framework and objectives we have set - either ourselves or working with an external research provider like the Transition Pathway Initiative. In the case of our alcohol engagement programme, we commissioned an external research provider, VigeoEIRIS to research companies' performance against our standards.

In collaborative engagements we expect the programme organisers to have a system for engagement monitoring and review. We will actively participate in the process for establishing the framework for this, ensuring the programme has a clear focus and is aligned with our requirements. As with our own engagement programmes, we like collaborative programmes that we participate in to be subject to evaluation against external data. For example the PRI corporate tax engagement programme in which we participate is supported by research by independent consultants.

We keep our listed equities team and CIO informed of our engagement programmes, key engagements, and engagement difficulties or problems. We regularly liaise with our listed equity investment managers about our programmes and engagements with individual companies.

In an outsourced investment model, however, insights from our engagements are not systematically shared with our investment managers. We are normally all other contracts of the contract ofengaging in order to implement our ethical investment policies rather than pursuing concerns about financial materiality, although there is often good alignment between the two.

When we are engaging intensively with an individual company about which we have a deep and urgent concern, we seek input from managers holding the stock and share our insights with them. We are also keen to understand their view of the company and how they arrived at it and any contrasts with our own assessment. We regularly liaise with the manager of our UK passive mandate to compare notes on engagements and share insights.

We actively participate in investor conferences and forums such as PRI in Person, RI Europe, the UK RI Roundtable and the Church Investors Group to share our experience of engagement. We view this as an important way that we can share our insights much more broadly.

On climate change we have been regularly sharing Transition Pathway Initiative assessments with our managers and seeking their feedback and insight on

We systematically report our engagement and voting activity to trustees and publicly every six months in our engagement, screening and voting reports posted on our website.

PR 07.3	Provide a brief description of your organisations selection, appointment and monitoring of third party property managers and how they contribute to the management of ESG issues for your property investments.
	nissioners employ a range of property managers that are reviewed on a regular basis but our preference is to build long term relationships with ke s who understand our approach and share our values. ESG credentials are considered in the tender process (including health & safety, disability

non-discrimination, environmental/sustainability policy, quality standards observed, equal opportunities & data protection). These issues are also considered in monitoring of the ongoing relationship during which we have now also started to consider policies and practices to combat modern slavery.

Our agents contribute to the management of a wide array of ESG issues at our directly held properties. Key environmental responsibilities include the sourcing of power for common parts and monitoring of energy use, carbon emissions, water use and waste

Key social considerations include the payment of the London Living Wage to contractors' staff based at our properties, policies and practice in support of the eradication of modern slavery, health and safety management (including fire safety, a very high priority concern in residential property following the Grenfell Tower disaster in 2017), and monitoring for infringements of the terms of leases.

Quarterly reports are received from our managers. The Commissioners' agents do not have delegated authority and we make decisions on the terms of leases, which in our directly held properties may have a strong social dimension.

The Commissioners believe that we have an ethical responsibility to manage ESG issues well at our properties. We also believe that active management of property assets including with regard to ESG issues can create investment value.

We very much drive the management of ESG issues at our flagship prime central London residential estate, the Hyde Park Estate. We take pride in our stewardship of the Estate and believe that by doing so we sustain and create value.

An example of this philosophy in action on the Hyde Park Estate is our investment in promoting urban biodiversity. Working with ecologists from organisations such as the RSPB, the Wildlife Trusts and Bug Life, the Commissioners are promoting wildlife through planting for wildlife and installing insect stacks, bee nests, bird and bat boxes, and green roofs (see: https://www.hydeparkestate.com/#content/page/London's-Green-Estate). In 2018 we conducted a major renovation at the Estate's Water Gardens which included integrating new planting beds and a rainwater harvesting system.

Other sustainability initiatives on the Estate include supporting sustainable transport through the creation of secure bicycle parking facilities. With regard to energy efficiency and carbon emissions reduction, investment has been made in new communal boilers, LED lighting in common parts and solar powered garden tools. When Assured Shorthold Tenancies became void in 2018, properties were transferred to a green energy supplier, and electricity for common parts is all supplied on a green tariff. Initiatives have been taken to address energy wastage with measures like taking excess radiators out from lobbies. More significant improvements, particularly glazing, will be possible as part of the major refurbishment works that are under consideration.

The Commissioners are also investing in the public realm of the Hyde Park Estate in order to sustain and create value. Investment has been made in new railings, signage, restoring historical features and harmonising architectural detail. In 2018, new railings were installed in Hyde Park Square.

The Commissioners seek to promote diversity in the team managing the Hyde Park Estate, both internally and via agents, and have a higher than average proportion of women in decision-making roles.

Our largest retail asset is managed by our majority investment partner who operate to very high ESG standards that align well with our values and expectations.

In our commercial office portfolio our agents play the leading role in the management of ESG issues under our supervision.

O No PRI 2.3 Indicate the proportion of property assets for which your organisation, and/or property managers, set and monitored ESG targets (KPIs or similar) during the reporting year. O >90% of property assets O 51-90% of property assets

🗹 Other, speci	fy
Fire safet	у
DD 10.0	Additional information for the file

PR 12.3 Additional information. [Optional

Fire safety, following the Grenfell Tower disaster, remained a very major issue for the Commissioners' residential occupier engagement activity on the Hyde Park Estate in 2018, given we have high numbers of occupiers in high rise blocks. Key issues were reiterating the importance of both keeping communal areas clear of obstacles and maintaining fire resistant front doors. 1192 leaseholders were written to following the Grenfell Tower fire and sent a guide to fire safety. The Commissioners are undertaking a major programme, requiring a high level of occupier engagement, to ensure that occupier-installed front doors that do not meet fire standards are replaced with doors that do meet the required standards. 67% of doors have been surveyed so far.

Quarterly newsletters continue to be sent out to Hyde Park Estate residents which regularly cover ESG issues - issues covered in 2018 included the Water Gardens refurbishment, the Hyde Park Etate 150th anniversary social event, restoration of historic features including railings and balconies, health and safety in common parts by keeping them clear of personal belongings and a new art installation on the estate. All newsletters now include a 'green column', which has included tips on energy efficiency.

In 2018 letters were sent to tenants with a brochure marking the 150th anniversary of the Hyde Park Estate. A letter to long term rental tenants sought feedback about the Estate and the performance of the Commissioners' agents, inviting tenants to one on one coffee meetings with the Commissioners Residential Asset Management team.

Our agents hold quarterly resident surgeries at the larger blocks on the Estate. During 2018 our agents attended an additional 30 meetings with various groups of residents across the Estate regarding matters such as internal common parts redecorations and lift replacement works. Formal consultations are undertaken around development plans and all feedback recorded. Consultation drop-in events are organised and ad hoc meetings are held with individual tenants as required. Regular meetings were established with the newly formed Residents Association at 25 Porchester Place and Coniston Court.

PR 14.3	Additional information.		

In both the residential and commercial portfolios, the Commissioners engage on a regular basis (at least biannually) with residents, tenants associations, retailers and local government representatives and discuss ongoing concerns, including environmental and social issues.

With regard to the Hyde Park Estate, in 2018 multiple meetings were held with the Hyde Park Estate Association, the Hyde Park Square Garden Committee and the Gloucester Square Garden Committee. The Commissioners' Residential Asset Manager attended multiple meetings of the neighbourhood ward panel with the local police. He is also on the steering committee of the new neighbourhood planning forum. The Commissioners also funded and organised a community event on the Hyde Park Estate in the summer to celebrate the 150th anniversary of the Estate. Shopper satisfaction has been monitored previously using a shopper satisfaction survey. Stakeholder consultation feeds into our strategy for the Hyde Park Estate e.g. in our tenant mix strategy for the Connaught Village retail quarter.

In 2018 the Commissioners engaged with Westminster Council about its City Plan for 2019-2040 and through other consultations covering issues including meeting the borough's housing needs, improving provision for pedestrians, de-commissioning car parking spaces in favour of sustainable transport

measures, improving air quality, extending 20 mph zones, combatting anti-social behaviour, maintaining amenity and generally improving urban sustainability. Joint investment has been made in public spaces.

The Metrocentre, managed by Intu Group, conducts wide-ranging community engagement activities. The Metrocentre has its own chaplain who serves retailers and shoppers alike, supported by volunteer part-time chaplains. The Metrocentre hosts charity collections at weekends at main entrance points and a charity barrow for the sale of goods, raffles or charity promotional purposes.

The Metrocentre has developed a travel plan which involves providing travel information to users of the Metrocentre to enable them to make an informed choice of how they travel to the centre. It also involves establishing and developing partnerships with the local authority, transport operators, businesses in the Metrocentre area, and others in promoting sustainable travel.

The Metrocentre has an extensive accessibility programme including an assisted changing facility with track hoist, changing bench with shower and lima lift toilet; a Shopmobility scheme which offers 32 electric scooters and 50 wheelchairs, plus 24 parking bays for members; accompanied shopping for the blind or partially sighted; autism friendly shopping centre guides; and autism alert cards and awareness bands.
