

CHURCH STATISTICS 1976 YEAR BOOK

This section of the 1976 Year Book has been compiled by the Statistics Department of the Central Board of Finance from the Parochial Returns of Membership and Finance for the year 1973, and from information collected from other sources. Except for two tables relating to deacons, clergy statistics are not included because the Statistics Department has relinquished responsibility for the maintenance of the Central Statistical Register of the Clergy.

To enable quick reference to be made to some of the national totals of the detailed diocesan figures for 1973 which appear in Tables VIII-XI, XIII-XV, they are summarised in Tables I-V with comparable figures for 1970. Similar diocesan summaries, and extracts of diocesan figures from Table XII have already been sent to diocesan offices.

Membership and Population. When using the membership statistics, due consideration should be given to a changing population pattern influenced by annual births falling towards the much steadier level of annual deaths, and a continuing loss of population by migration. (See Tables VI, VII.)

Existing church electoral rolls came to an end in 1972 and new rolls were compiled early in 1972 in accordance with the Church Representation Rules attached to the Synodical Government Measure, 1969. Electoral rolls are revised annually.

Parochial Finance. Although the incomes of the parishes showed considerable increases in 1973 compared with 1970, the increases in most dioceses were not sufficient to overcome the effects of inflation in the years 1971-1973. Table XII has been included in this section to indicate the effects of the declining purchasing power of the £ on parochial incomes.

Please note

- This is a scanned copy of a historical report.
- Some numbers will have been updated since publication, owing to incorporation of late returns and corrections; please check more recent publications for any changes.
- Diocesan-level figures relate to diocesan boundaries at the time.
- Ways in which data are presented have changed over time; not everything in this document is necessarily presented the way that we would choose to do it today.

Notes. 1. The figures in column 10 represent the changes in armed forces plus adjustments to reconcile population change between 1961 and 1971 censuses with estimates of natural change and net civil migration.

2. The last twenty years have fallen into two distinct periods, a decade of increasing followed by a decade of decreasing annual births. Since 1964 annual births fell by an average of 2 per cent each year until 1971, and then sharply declined by about 7 per cent in 1972 and 1973. The natural increase (births less deaths) in 1974 was at an unprecedented level for a peace time year. 5.

3. The fall in the number of births has been the main factor in the diminishing level of the natural increase of the population over the past decade, but a contributory factor has been a slow upward trend over several decades in the number of deaths. This latter feature is reflected in the changing age structure of the population, particularly the increase in the numbers of elderly people as illustrated in Table VII.

Notes. 1. Thirty-four dioceses supplied detailed statistics for 1974 showing the numbers of males and females confirmed in each of four age groups.

(i) Of the total numbers confirmed in those dioceses, 18 per cent males and 18 per cent females were under 12 years of age, 57 per cent males and 54 per cent females were between 12 and 15 years, 8 per cent males and 7 per cent females were between 16 and 19 years, and 17 per cent males and 21 per cent females were 20 years of age and over.

(ii) About 73 per cent of all confirmations occurred before age 16.

(iii) About 39 per cent of all confirmations were males and 61 per cent females.

Notes. 1. All figures obtained by the Statistics Department from the Central Statistical Register of the Clergy are computed on a calendar year basis.

2. The numbers of deacons in 1974 who were university graduates or non graduates are given in Table XXVI.

3. 45 of the deacons ordained in 1974 were for the auxiliary ministry. They are included in the figures in column 12, and are also shown separately in brackets in that column. Their average age of ordination was 50 years; the youngest was 22 and the oldest 73 years of age. The average age at ordination of 345 deacons who became full-time assistant parochial clergymen and 3 who took up non-parochial appointments was 30½ years; the youngest was 22 and the oldest 66 years of age.

CHURCH ELECTORAL ROLLS

C.B.F. ref. nos.	Dioceses	Numbers on Church Electoral Rolls 1972	Numbers on Church Electoral Rolls 1974	NEW ELECTORAL ROLLS
(1)	(2)	(3)	(4)	(5)
	PROVINCE OF CANTERBURY			
1	Canterbury . . .	46,328	48,954	<p>1. QUALIFICATION In 1919-20 a new system of Church Government was set up. The electoral basis was the roll which had to be prepared in each parish and there have been only small changes in the qualifications for entry since that time. The present rule provides that a person may apply for entry if he (i) is baptised; (ii) is a member of the Church of England or another Church of the Anglican Communion or Church in communion with the Church of England; (iii) is seventeen or over, and (iv) is resident in the parish or if not so resident, has habitually attended public worship in the parish during a period of six months prior to enrolment.</p> <p>2. REVISION Electoral Rolls are revised annually, the names of those no longer qualified being removed and the names of others applying being added. The system is not always effective in establishing a realistic roll as insufficient care may be taken in revision. Another important factor is that any person who is baptised and resident has a right to claim membership of the Church of England and entry on the roll regardless of whether he attends services or otherwise shows interest in Church affairs. The names of persons within this category cannot be removed without their consent.</p> <p>3. NEW ROLLS The Church Representation Rules attached to the Synodical Government Measure 1969 required that for the first time existing rolls should come to an end, in the early months of 1972 and thereafter every six years.</p> <p>4. DEDUCTIONS It is impossible to make any accurate deductions from the figures on either the total membership of the Church or the practising membership for the following reasons: (1) Entry on the roll gives certain privileges but the roll is an electoral roll not a membership roll as no person need apply for entry unless he wishes (2) Any resident may have his name entered on the new roll regardless of whether he is a practising member (3) Since 1974 a person may have his name on any number of rolls if he is properly qualified. Previously he could be enrolled in two parishes, but not more, and a careful record was kept of persons in this situation. (4) While parishes were urged to inform qualified practising Church members of their rights, it is likely that there were considerable differences in the steps taken and the energy with which they were pursued. (5) Persons under the age of seventeen are not eligible</p> <p>But having mentioned these caveats the figures are of interest and it will be easier to judge the situation after each following six-year period when new rolls will be prepared on the same basis as in 1974.</p>
