Foreword

Introduction

Church Statistics 2003/4 continues to provide results from fresh attendance measures collected by Church of England parishes and cathedrals since the turn of the millennium. These measures must be interpreted against the background of a growing number of government and other independent national surveys. National surveys continue to endorse the 2001 government census results that indicate a continuing majority of the English population to be Christian. In summary, 72% of the population of England indicated their religious affiliation to be Christian, 6% of other faiths, 14% of no religion and 8% did not state their religion.

In a pluralistic society, Christian denominations continue to play a significant role in the life of our country. Approximately half of the adult population regards itself as Anglican (2003 and 2001 Opinion Research Business surveys). *Church Statistics 2003/4* provides more detailed geographical evidence of the continued involvement of the Church of England in the everyday lives of men, women and children at the beginning of the twenty-first century. This builds on similar information first published in *Church Statistics 2002* and has been facilitated by the successful completion of the digitisation of the parish boundaries sponsored jointly by the Church of England dioceses and the Church Commissioners.

New attendance statistics

Following a major review of annual statistical information collection from parishes, new attendance measures were designed with dioceses during the summer of 2000. These are generally based on a four week count by parishes of their attendance levels at church worship in October. There is no single period in the year when church attendance could be said to be 'normal' or even 'average' but October is accepted by our ecumenical partners as the easiest and most comparable month in which to carry out this quantitative exercise.

It would be wrong to make direct comparisons between the number counted in church services across October and the figures that churches estimate as their *usual Sunday attendance*. Examination of the attendance levels collated in this publication in figure 2 'All age church attendance 2000 to 2003' and 'Church attendance 2000 to 2003' in tables 3 and 4, reveal **a larger church than was previously understood**

and fairly static levels of church attendance. On average 1.2 million people attended church-based services of worship each week in 2003, 1 million of these on Sundays. Numbers fluctuated week by week, among adults on average doubling at points across the month while almost quadrupling among children and young people. Across a typical month in the year parish church and cathedral worship attracted 1.7 million people but only 1.4 million of these attended on Sundays. The Church is indeed a seven days a week Church, and in 2003 over half, i.e. 23 dioceses, saw increases in their adult church attendance levels as shown in figure 7 '2003 Adult church attendance'.

Easter and Christmas are festivals in the Christian year when traditionally many attend special occasions of worship in our parish churches and cathedrals. Churches and cathedrals were asked to estimate attendance levels at these festivals for the first time in 2000. The results are challenging, and in the case of cathedrals reflected steadily increasing numbers throughout the year. On Christmas Day/Eve 2003 2.65 million people attended church and cathedral worship, while 1.5 million attended on Easter Day. The importance of this Christian festival in people's lives is evident in that Christmas services attracted over twice the average weekly attendance of our parish churches and cathedrals. Figures collected in previous years were directly comparable.

Occasional offices

The church has traditionally monitored electoral roll and baptism levels, but from 2000 parishes and cathedrals have been asked to estimate the number of occasions where people received direct pastoral contact through each of the occasional offices. Marriages can be performed in recognized places other than churches and cathedrals. Tables 22 and 23 showing 'Total marriages in England' and 'First marriages, England and Wales' (based on local authority registrars' returns) indicate that just under a quarter of marriages were performed by Church of England ministers. Local churches had significant opportunities for mission and ministry through 440,000 occasional offices performed by their ministers in 2003. Funerals accounted for over half of these which is a significant pastoral load for many clergy. Baptisms and thanksgivings represented over a third of the occasional offices, marriages and blessings of civil marriages about one in seven. At these essentially family and community events, local churches have unique opportunities for contact among a wide constituency and recent opinion surveys show this to be valued by the Christian public.

Licensed ministers

All God's people are called to exercise their ministry in his world and in his Church. The statistics of this report relate to ministries which are nationally licensed. This introduction draws attention to some significant trends.

The total number of **stipendiary clergy** available for diocesan appointments continues to decline. Since the turn of the millennium there has been a net loss of 6%. This is projected to continue at a similar level with the net loss over the period 2004 to 2009 approaching 700 from a current total of 8,897. (These figures include clergy with full-time appointments and those with part-time appointments aggregated to their full-time equivalents. Europe, due to the special nature of its chaplaincies, is excluded.) These projections take into account the expected number of ordinations to stipendiary ministry. This figure stood at 235 in 2004. It is estimated to rise to 274 in 2005 and then fall back to 235 in 2006. For the years 2007 to 2009 a moving average of the previous five years ordination figures has been used. The number of people entering stipendiary ministry is not sufficient to replace those who are retiring. Detailed figures on the age structure are contained in 'Clergy age profiles and age structure' in figures 34 to 36.

Among those licensed as **unpaid ministers**, the number of non-stipendiary ministers was 1,855 in 2004, compared with 1,779 in 2003 and 1,772 in 2000, a rise of 5% since the turn of the millennium. The number of ordained local ministers was 545 in 2004 compared to 498 in 2003 and 311 in 2000; thus there was a 75% increase in ordained local ministers between 2000 and 2004. The number of licensed readers has decreased by 3% over the same period. In 2004 there were 8,426 licensed readers, fewer than the 8,476 in 2003 and 8,694 in 2000 (excluding readers with permission to officiate and active emeriti).

The number of **women clergy**, stipendiary and non-stipendiary, continues to rise. In 2004 there were 1,401 women in full-time stipendiary diocesan appointments compared with 1,359 in 2003 and 1,140 in 2000, generating a four year rise of nearly a quarter (23%). These figures include the Diocese in Europe. Women make up between one in six and one in seven (16%) of stipendiary parochial clergy. Out of every twelve incumbents one is a woman (8%). The equivalent figure for clergy of incumbent status is one in five clergy (22%). Of a total of 373 dignitaries

in 2004, 21 were women, five more than 2003 and nine more than 2000. Women in non-stipendiary ministry in 2004 made up approaching a half (45%) of the total, and in ordained local ministry just over one half of the total. For licensed readers the equivalent figure is similar at 45%.

The Church also benefits from the ministry of 243 Church Army evangelists, 604 professed members of religious communities, of whom 92 are ordained, and 1,238 **chaplains** working with mission agencies, the armed services, in hospitals, prisons, schools, higher and further education. In each of these categories of ministry there have been slight increases in numbers since 2003 although in each category there are fewer people than in 2000. In 2003 there were 239 Church Army evangelists, 591 professed members of religious communities and 1,216 chaplains. In contrast, in 2000 there were 257 Church Army evangelists, 729 professed members of religious communities and 1,258 chaplains.

The total number of **recommendations for training** in the sponsorship category of stipendiary/non-stipendiary ministry was 342 in 2004 – a rise of 17 over 2003. The numbers of men and women recommended in 2004 were 193 and 149 respectively. The number of people recommended for training for permanent non-stipendiary ministry rose from 123 in 2003 to 153 in 2004. The numbers of men and women recommended in 2004 were 61 and 92 respectively. The number recommended for ordained local ministry was 69 in 2004 (31 men and 38 women), an increase of twelve from 2003.

Overall there are a greater number of candidates in training on theological courses (638) at the end of 2004 than were at theological colleges (501). This is the reverse situation to 2000 when 578 were on training courses and 622 were at colleges. Over the last four years the overall number in training for ordination has dropped 5% with greatest number of candidates recommended for training being in the age range 40 to 49 years. The number of readers in training continues to fall, from 1,315 in 2000 and 1,166 in 2003 to 1,081 in 2004 (an 18% drop over four years).

Financial giving

We can count the number of people who give to the Church by Gift Aid and the total sums that they give. This is the primary source of the Church's income and it was gratifying to see that the total sum given by these people increased by 6% and went above £200 million for the first time. Just over £60 million was recovered from the Inland Revenue in respect of this giving. On average, before the recovery of tax, each gift was £7.55 per week as shown in table 46 'Tax-efficient planned giving average weekly rates'.

The number of **tax-efficient planned givers** continues to increase and since 2000, when the new arrangements for Gift Aid were brought in by the Government, another 100,000 donors now give in this way. It might be expected that some of these donors have moved from just putting loose cash in the collection plate to giving by weekly envelope or standing order by Gift Aid. The amount given in loose cash went down by 1.4%, corresponding to a reduction in giving of about £800,000. The increase in giving by Gift Aid went up by over £11 million.

Income from other sources, such as donations, did not increase at such a high rate. The total income from all forms of donation increased by 3.8% and almost broke through the £400 million barrier.

It has long been felt that the Church should be able to encourage its people to leave **legacies** to the Church for its work in parishes and through its mission and voluntary societies. If the Church cannot talk positively about death, who can? About £37 million was left to the parishes in 2003 – a steady increase in recent years and 9% more than the previous year. The increase may, of course, be due to the rise in the value of estates because of the rise in house prices rather than an increase in the number of legacies.

Interesting though these movements in the Church's income are, they should not in themselves be the source of encouragement to Church people to give. True Christian giving is a response to the relationship that we have with God through his grace and not just because the size of the bills is increasing. The question that each Church person must ask is, 'how can my giving reflect something of God's love for me?'

Summary

Today people support their local churches, chapels and cathedrals in many different ways. A national opinion survey in October 2003 by Opinion Research Business revealed that 86% of adults had visited a local church or chapel in the previous year for a wide range of activities alongside attendance at church worship. While the quantitative information is not fully comprehensive, it does provide a healthy picture of the variety of local church life. Church attendance patterns, the role of the occasional offices, the increased diversity of ordained and lay ministries, financial giving and other measures of church support are all continuing to evolve at the turn of the millennium in ways which are beginning to capture the interest of many serious Church commentators.

We are particularly grateful to the dioceses and the parishes for continuing to embrace new aspects of the annual parochial return exercise. Their co-operation continues to remain crucial to the successful gathering of the information required for this publication, and we are encouraged that they too are finding the results useful for their own forward planning. This edition includes as much appropriate information as possible from the Diocese in Europe and from diocesan cathedrals.

To view an online version of the book containing additional maps in colour please visit the Church of England web site at www.cofe.anglican.org where statistics will be updated throughout the year.

Research and Statistics Department
Archbishops' Council, August 2005

Definitions

In the tables relating to **attendance at church services** new measures of church attendance are employed:

Average Sunday attendance = the average number of attenders at Sunday church services typically over a four week period in October.

Average weekly attendance = the average number of attenders at church services throughout the week typically over a four week period in October.

Each of the above measures are provided separately for adults and children/young people aged under 16 years. The highest and lowest counts over the four week period are calculated as follows:

Highest Sunday/weekly attendance = the sum of the highest Sunday (weekly) attendances over the four week period.

Lowest Sunday/weekly attendance = the sum of the lowest Sunday (weekly) attendances over the four week period.

Attendance figures have only been included where local churches held at least one church-based service (which included adult presence) during the week under examination.

In the tables relating to **finance**, components of income and expenditure are defined as follows:

Income

Tax-efficient planned giving	=	tax-efficient planned giving including giving regular Gift Aid donations.
Total direct giving	=	planned giving plus church collections and boxes.
Other voluntary income	=	all other voluntary income for ordinary expenditure excluding income tax, e.g. fund-raising events, net profit on magazine/bookstall, sundry donations.
Total voluntary income	=	direct giving plus income tax plus other voluntary income.
Other recurring income	=	dividends and interest, recurring diocesan and other grants, and all other income for expenditure on ordinary purposes of the PCC, net surplus from church hall or other buildings, income from endowments or trust funds if used for ordinary purposes.
Total recurring income	=	total voluntary income plus other recurring income.

Expenditure

Total recurring expenditure	=	the total of ALL expenditure (including charitable giving) for the ordinary purposes of the PCC, i.e. excluding only non-recurring items of capital expenditure and non-revenue items.
-----------------------------	---	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Notes

1. While many figures in this booklet have been rounded, totals, percentages and averages were calculated before rounding. Hence row and column totals will not always agree exactly with the sum of the stated amounts.
2. Among the 13,000 parishes of the Church of England there are around **600 Local Ecumenical Partnerships** in roughly half of which there is a congregation and a ministry shared between the Church of England and certain other churches. In such circumstances it is not always possible (or indeed desirable) to isolate the Anglican component of the congregation. The parochial statistics will therefore include a small element which may appear also in the statistics of other churches.
3. Figures for **cathedrals** and the **Diocese in Europe** are included as far as possible. Their inclusion is most frequently inappropriate in the finance tables.
4. **Unrestricted income** is income that may be used by the PCC for general church expenses. **Restricted income** is income which may not be used for any purpose other than as specified by the donor. (Income which a PCC designates for a specified purpose is considered to be unrestricted, since the PCC and not the donor is determining how it is to be used.)
5. **Recurring income** includes direct giving, other voluntary income and any other recurring income. **One-off income** includes non-recurring grants, legacies, special appeals, insurance claims and the sale of fixed assets.
6. **Recurring expenditure** includes donations to charities, parish share/quota, clergy expenses, church running costs, costs relating to trading, salaries and support costs. **Capital expenditure** includes major repairs, redecoration and new building work.

Notes :

- The right hand set of figures in each column gives the magnitude, in descending order, of the left hand figures. Thus from column 4, Bath and Wells is the 11th largest diocese, Birmingham is the 41st.
- C and Y denote dioceses in the Provinces of Canterbury and York respectively.
- Diocesan population figures are based on the 2002 mid-year estimates. Crown copyright material is reproduced under Class Licence Number C01W0000297 with the permission of the Controller of HMSO. However as government boundaries do not match diocesan boundaries there has to be an element of estimation.

Col. 4 : Area figures are calculated from material supplied by ONS and the Church Commissioners.

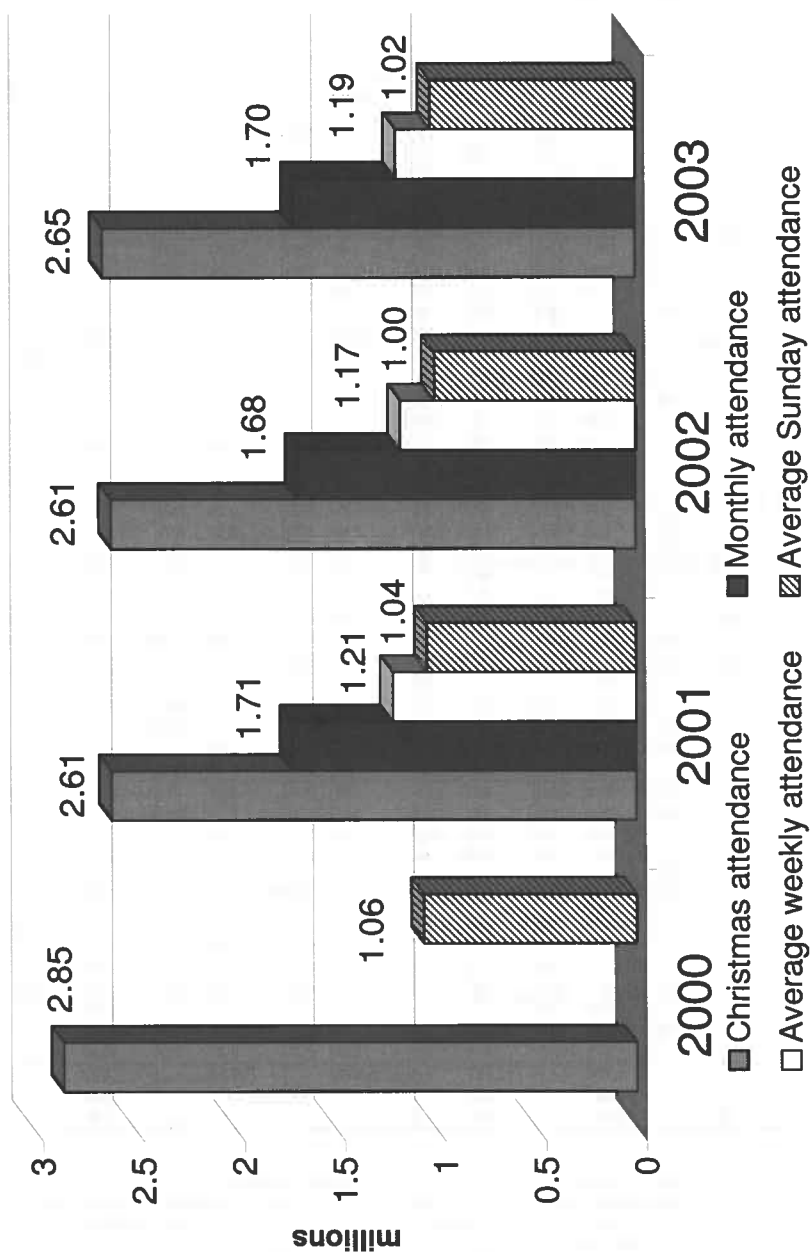

Col. 6 : Benefices with parishes attached as listed in the Parish Register maintained by the Research and

Col. 7, 8 : As listed in the Parish Register maintained by the Research and Statistics Dept. Includes 95 churches with no building.

Col. 9 : As at 31 December 2004. Source: Church Commissioners. Does not include 254 part-timers.

The Diocese in Europe is composed of 295 separate congregations.

2 All age church attendance 2000-2003

Church attendance 2000 to 2003

3 Weekly church attendance

Year	Weekly attendance								
	Adult			Children and young people			All age		
	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s
2000*	1,451	1,031	742	455	243	120	1,855	1,274	885
2001	1,332	976	727	416	229	113	1,708	1,205	862
2002	1,296	941	693	424	229	111	1,682	1,170	825
2003	1,312	957	714	430	230	110	1,704	1,187	844

4 Sunday church attendance

Year	Sunday attendance								
	Adult			Children and young people			All age		
	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s	Highest attendance 000s	Average attendance 000s	Lowest attendance 000s
2000	1,191	878	660	300	180	103	1,464	1,058	781
2001	1,170	868	657	285	173	99	1,425	1,041	774
2002	1,143	838	623	278	167	94	1,395	1,005	733
2003	1,156	853	645	272	164	92	1,401	1,017	755

- Notes: 1. Figures for cathedrals and their daughter churches are included.
 2. Children and young people are under 16 years of age while adults are 16 years of age or over.
 3. From 2000 church attendance figures are calculated typically from a four-week count in October.
 4. *In 2000 attendance at midweek weddings and funerals was included.
 5. An approximation to monthly attendance can be taken from the highest weekly attendance counted over a typical month.

- Notes:**
1. Electoral Rolls are revised annually and new rolls are compiled every six years. Thus in 1990, 1996 and 2002 new electoral rolls were compiled.
 2. Figures for cathedrals are included from 2001 onwards.
 3. N/A These figures are not available so national electoral roll totals for 1990 and 1996 do not include the Diocese of Europe.

Notes:

1. * The infant baptism figures for 1980 and later years are not directly comparable with those of previous years, because from 1978 the returns have specified infant baptisms as those under one year of age in order to relate more realistically to live births.
2. Before 1957 the minimum age for inclusion in the electoral roll was 18. From 1957-1980 the age was lowered to 17, after which it was reduced again to 16. Electoral roll figures for 1982 and previous years include some cathedral rolls. These have been excluded from the figures for later years.
3. # Since 1972 new rolls have been prepared every 6 years. Such years are marked with a # symbol.
4. N/A These figures are not available.
5. **Electoral roll and confirmation figures for 1997 to 2003 include the Diocese in Europe.

Notes 1. Figures for cathedrals are included.

2. Data in columns 3 and 5 are estimates based on statistics obtained from the Office for National Statistics (ONS).

20 Baptisms 1980-2003

The graph above shows the steady decline in the numbers of infant baptisms each year has continued into the beginning of the decade. The numbers of children, young people and adults being baptized is approximately 45,000 which follows the long-term stationary trend. In 2003, 69% of the people baptized were infants, 26% were children and 6% were aged 13 years or over. These proportions are similar to those of recent years, however the graph shows the shift in baptismal practice since the beginning of the 1980s. Of those baptized in 1980, 85% were infants and 15% were children or adults. In 1990, 80% were infants, 15% were children and 4% were aged 13 years or over. A more complete time series of baptisms over the twentieth century is available on page 17.

Note: For 1980* 'all other persons' are included with 'children' as figures were not collected separately until 1987.

- Notes:
1. N/A=not available. 2002 is the latest year for which full data is available. Provisional statistics for 2003 show 267,700 marriages in England and Wales, of which 59,850 (22%) were Church of England/Church in Wales marriages, and 86,080 (32%) were marriages with religious ceremonies.
 2. **first marriage = marriage between single people.
 3. The 2002 figures shown are final figures and replace the provisional figures shown in the previous edition.
 4. ***The 2003 are provisional.

26 Comparison of licensed ministries 2004

Stipendiary clergy	9,229
Non-stipendiary clergy	2,400
Chaplains, etc.	1,238
Layworkers and Church Army evangelists	381
Active retired ordained	4,497
Licensed readers	8,426
Readers with permission to officiate and active emeriti	2,177

The figures for stipendiary clergy (which include those outside the clergy share system) and for lay workers above are based on statistics derived from the central Church payroll. Details of chaplains and other ministers working outside the diocesan framework, and of non-stipendiary clergy, are based on statistics derived from the database used to compile *Crockford's Clerical Directory*. Where possible, they have been cross-referenced with material produced by organizing bodies, e.g. the Church Army, the Home Office for prison chaplains, and the Hospital Chaplaincies Council for hospital chaplains.

The figure shown for active retired ordained clergy is an estimate of the number of licensed retired clergy who take an active part in ministry. It is based on the number of retired clergy known to have either permission to officiate, licence to officiate or actual appointments (4,497). Pension Board records indicate a total of 8,575 retired stipendiary ministers.

Note: The figures for Church Army evangelists do not include ordained evangelists who are included elsewhere.

30 Chaplaincy and other ministries 2004

	men	women	total
Royal Navy chaplains	37	0	37
Army chaplains	83	1	84
Royal Air Force chaplains	47	1	48
Prison chaplains	96	27	123
Hospital/healthcare chaplains*	196	83	279
School chaplains	120	20	140
Higher and further education chaplains	47	12	59
Other chaplains/ministers	287	52	339
Ordained staff of theological and bible colleges and other Christian centres for education and research	95	34	129
Total	1,008	230	1,238

The figures for chaplains and other ministers working outside the diocesan framework are based on statistics derived from the database used to compile *Crockford's Clerical Directory*. Where possible, they have been cross-referenced with material produced by organizing bodies (e.g. Ministry of Defence for the forces chaplains; Home Office for prison chaplains; Hospital Chaplaincies Council for hospital chaplains).

Notes

- The table does not include chaplains counted elsewhere in the statistics; for example chaplains who also have a diocesan appointment.
- Apart from chaplains, ordained members of the teaching staffs of schools and colleges are not counted here, but are included within the non-stipendiary figures in table 29.
- Where an individual holds more than one appointment it has to be a subjective decision as to where to place an individual. This means that there is inevitably some disparity between the above figures and those for previous years.
- Other Chaplains/Ministers: Includes full and part-time ordained staff of retreat houses, conference and healing centres, shrines, almshouses, missionary societies and communities (other than those shown in the Religious Communities chart in table 32). It also includes part-time hospital and university chaplains.
- In addition there are 243 lay Church Army evangelists, 122 accredited lay workers on the Church Commissioners payroll, 14 full-time clergy on the staff of Church House and Lambeth Palace, and 16 deaconesses.

* Figures for Hospital and Healthcare are for May 2005.

Column 9 includes Assistant Curates and Parish Deacons.

The stipendiary clergy share system

A single clergy deployment formula was introduced in 1995 and continues to be approved by the House of Bishops. Its intention is to ensure that stipendiary clergy are distributed equitably amongst dioceses according to need. The Diocese in Europe is not included because of the special nature of its chaplaincies.

The apportionment involves four factors for each diocese and uses the latest available statistics, weighted as shown in brackets:

- Population (8) to reflect the number of persons for whom a pastoral responsibility is assumed;
- Area (1) to reflect the larger distances covered in rural dioceses;
- Membership (3) to reflect the number of Church members to be cared for. It is measured by: one-third Electoral Roll members plus two-thirds Average Weekly Attendance, adults, children and young people;¹
- Number of churches (3) to reflect the number of services that need to be provided in different churches.

All clergy in parochial or diocesan posts count towards the allocation unless their responsibilities are national, provincial or cover more than one diocese.

The share calculation takes part-time stipendiary clergy into account. There were 8,767 full-time stipendiary clergy as at 31 December 2004 and 254 part-time stipendiary clergy. The whole-time equivalent of the part-time clergy was calculated to be 130, thus giving a total deployable stipendiary workforce of 8,897. The distribution of stipendiary clergy across the dioceses as at 31 December 2004 and the diocesan share allocations are shown on page 35.

¹ The average number of all attenders at church services throughout the week typically over a four-week period in October.

Note: The 'Actual' is the number of full-time stipendiary clergy plus the whole-time equivalent of the part-time clergy

Projections of stipendiary clergy numbers

The table below shows the latest projections for the number of stipendiary clergy working in the diocesan framework up to the end of the year 2009. A strong note of caution must be attached to these projections. There remains a large degree of uncertainty about the various 'comings and goings' which combine to produce the total clergy number.

38 Full-time equivalence of stipendiary clergy in diocesan ministry: 2000-2004 and projections 2005-2009

Year (Dec)	Men	Women	Total
2000	8,320	1,170	9,490
2001	8,080	1,260	9,340
2002	7,870	1,330	9,200
2003	7,670	1,430	9,100
2004	7,430	1,470	8,900
2005	7,260	1,480	8,740
2006	7,090	1,530	8,620
2007	6,940	1,550	8,490
2008	6,790	1,570	8,360
2009	6,620	1,580	8,200

In each case, the figures above have been rounded to the nearer 10.

These projections assume that for both men and women the recent patterns for deaths in service and resignations will continue into the future. Since the number of deaths in service and resignations in a year will depend on the number of clergy at the start of the year, these numbers are likely to decrease in the future as total clergy numbers fall. Estimates of future retirement patterns are based on those of the last three years, with more weight being given to the 2004 figures. The average age for clergy has been increasing slowly over the last 20 years and now appears to be stabilising at approximately 50 for both men and women (pages 32-3).

The most recent information available indicates that 274 ordinations will take place in 2005 and 235 in 2006. These figures have been assumed for the 2005 and 2006 projections. For the years 2007 to 2009 a moving average of the previous five years' stipendiary ordination figures has been used (table 42). These are revised estimates where most recently it was assumed there would be 251 ordinations each year from 2005 onwards. Ordination numbers are estimated several years ahead in consultation with the theological institutions and dioceses and there will be factors influencing these figures which at this stage cannot be anticipated.

The likely number of other entrants to stipendiary ministry is also uncertain. These include those transferring from non-stipendiary ministry, chaplaincies, returning from a period outside ministry or coming from other provinces. In the absence of any strong evidence it has been assumed that the number will remain close to recent levels for the next few years.

Consequently, it is impossible to give exact predictions, but the evidence continues to point to a decreasing availability of stipendiary clergy over the next few years. The number of people entering stipendiary ministry is not expected to increase significantly and is more than offset by the large number of existing clergy who are approaching retirement. In contrast, the number of non-stipendiary clergy continues to increase (table 29).

The table on the following page shows the projected individual diocesan shares for the year-ends 2005 to 2009. These figures should be viewed with great caution. They depend on the latest diocesan based government population projections and may fluctuate from one year to another. The projections should be treated only as pointers to future diocesan shares assuming that current national trends are maintained.

The supply and demand of stipendiary clergy is monitored annually by the House of Bishops.

Full-time stipendiary clergy losses and gains 1990–2004

The following tables are based on the numbers of clergy leaving and entering the clergy payroll (excluding the Diocese in Europe), which is held currently by the Church Commissioners. The losses and gains recorded under headings include people who have moved to and from posts which are funded by external agencies such as National Health Service Trusts, the Prison Service, mission agencies or schools.

The total number of full-time stipendiary clergy at the end of 2004 was 8,767 (7,371 men plus 1,396 women). The number of full-time stipendiary clergy plus the whole-time equivalent of part-time stipendiary clergy within the Clergy Apportionment process is 8,897 which is slightly lower than the previously projected figure of 8,916.

40 Annual losses and gains, full-time stipendiary clergy: men

Year	Deaths in service	Retire- ments	Other losses	Ordin- ations	Other gains	Net loss	Number at Dec 31

Notes:

- Major church repairs and other major repairs statistics are collected each year within the major capital expenditure section of the parish finance returns.
- The 2003 parish finance returns included the following 'one-off' questions: -
 - * Based on your most recent quinquennial inspection report(s), what is the estimated cost of repairs still needed to the church(es) covered by this form?
 - ** How much of this estimated cost is for repairs to listed churches?

66 Government regions and the English dioceses

Source: Geographical Information System Parish Mapping (Church Commissioners/Archbishops' Council)

- Notes:
- See figure 1 for diocesan reference numbers.
 - The Channel Islands are annexed to the Diocese of Winchester.
 - The Isles of Scilly are included in the Diocese of Truro.
 - The Diocese in Europe is part of the Province of Canterbury. It has clergy and congregations in the rest of Europe, Morocco, Turkey and the Asian countries of the former Soviet Union.
