applies to the Commission for approval of the following proposal: *short description*

Renewal of Protective Glazing Ferramenta to nIII

Summary of the nature of work and its extent (and materials) [or in the case of an object, a short description of it and details of the proposal]

For its upcoming exhibition, “Thomas Becket: Murder and Myth”, the Chapter of Canterbury Cathedral will be loaning Miracle Window nIII to the British Museum from 15th October 2020 to 14th February 2021. In its letter of Consent for the loan, dated 11th November 2019, the CFCE determined:

“Conservation proposals for the Miracle Window were, however, considered to be more major, including the replacement of the corroding aluminium frame around the stained glass with a powder coated mild steel version. It was agreed that any conservation work to the window would need to be the subject of a new application to the Commission, as had also been recommended by the Cathedral’s FAC.”

Detailed proposals are hereby brought to the Commission for approval under the Measure. The works principally concern the ferramenta of the secondary glazing that was installed in 1989. The historic glass does not require involved conservation at this time that would be considered as having material consequence, being limited to light dry brush cleaning under low extraction.

The proposal includes the replacement of the existing aluminium ferramenta with a new powder coated CZ121 brass traditional ‘fishtail’ ferramenta affixed to new iroko subframe. The new subframe replaces that of 1989, increasing dimensions within the reveal to give an increased interspace between historic and protective glazing, and ventilation to the Church interior.

Plans, drawings, specifications or other documents

The proposal is described by the following items which accompany the form:

List and number the items and give reference numbers, if applicable.

1. Specification for support structure for exhibition at the British Museum and subsequent improvements to the protective glazing system for the window [Leonie Seliger, Stained Glass Studio]
2. Technical drawings: BMNIII/00; 01; 02; 03; 04; 05 [Leonie Seliger, Stained Glass Studio]

applies to the Commission for approval of the following proposal:

*Short description e.g.
repair of stonework,
sale of silver.*

The Proposal

To create and install a new, carved, stone panel to replace that missing at the east end of the chest of the Amphibalus Shrine Base.

Summary of the nature of the work and its extent (and materials) [or in the case of an object, a short description of it and details of the proposal]

A new carved, stone, panel measuring 442mm W x 479mm H will be created to replace that is missing at the east end of the chest, The proposed design is now to replicate the design of the west end, that is to carry on the liner designs with fleur de lys in the centre of a Star of David. The new carving will include the date MMXX making it quite clear that whilst the design is appropriate to the age of the shrine base, it is a modern replacement of the lost panel. The letters “K” and “M” will also be added in recognition of two major donors to the project. In order not to delay the reconstruction of the Shrine Base whilst the panel is being carved a temporary blank panel will be set in place at the east end.

Plans, drawings, specifications or other documents

The proposal is described by the following items which accompany this form:

- 1: Statement from the Dean of St Albans, The Very Rev'd Dr Jeffrey John**
- 2: Drawings of the east panel**
- 3: Precedent's Study: Examples of mid-14th century relief panels
By Dr David Carrington, Skilligton Workshop Ltd**

List and number the items and give reference numbers, if applicable.
