

GENERAL SYNOD

LUMI VOTING INSTRUCTIONS

Login to the Lumi Voting Platform

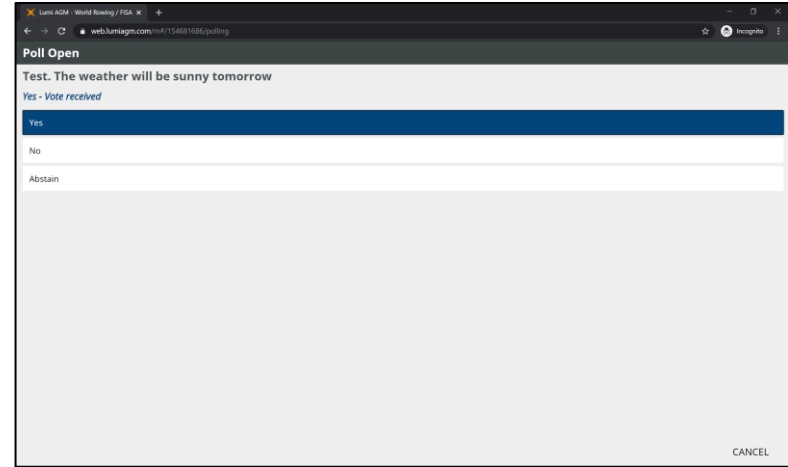

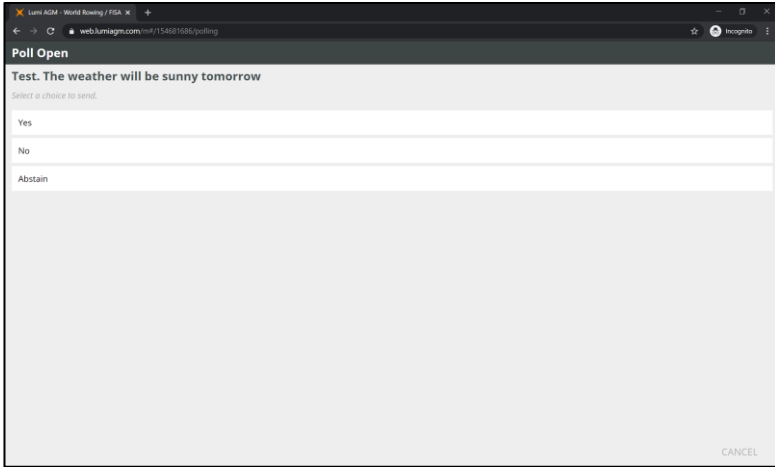

- All Synod members should login to the Lumi Voting Platform at the start of each day, and keep it open.
- Using your browser, go to <https://web.lumiagm.com>
- Enter Meeting ID: **160-956-299**
- Enter your Username and Password that you will receive by email.

When a vote is announced, you must go to the Lumi Voting Portal. Unless you are using a separate device on which to vote, minimise the Zoom Meeting and return to the voting portal within your web browser. You will still be able to hear the meeting.

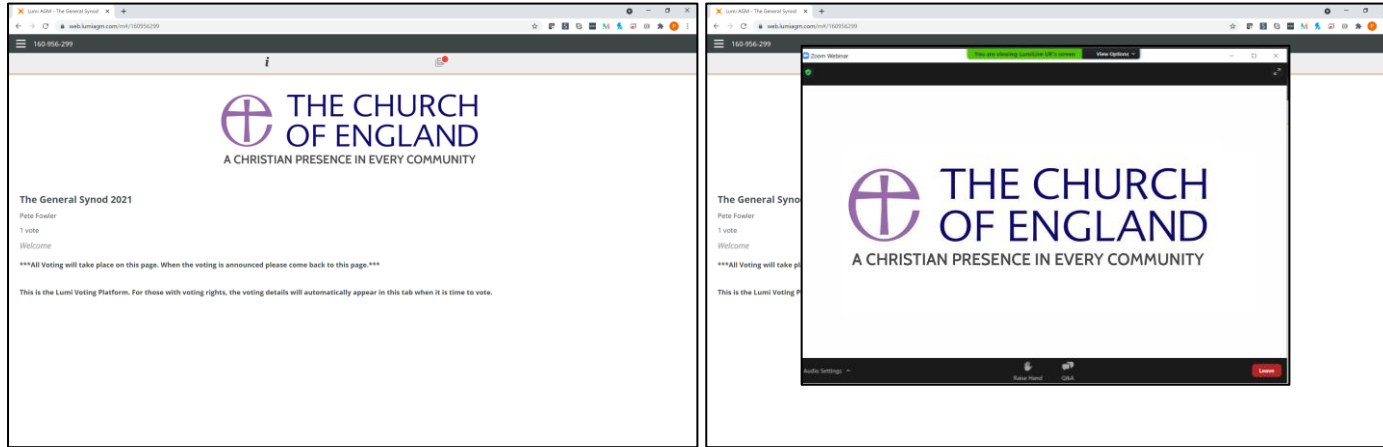

The vote will only appear in the voting portal when the Registrar announces the vote is starting.

Once the Registrar announces the vote is open it will automatically appear. Here you will see the voting question and voting options. Simply click on your desired selection. You will note that a **'Vote Received'** message will appear to confirm your vote has been cast.

If you wish to change your vote, you can do so whilst the vote remains open by clicking on another selection and the vote received message will change. When the poll closes you can no longer change your vote.

Please note that only your last choice of vote will be counted.

When the vote is closed the Voting Portal will return to the information screen (above left). If you are not using a separate device to vote, you can now return to the Zoom meeting on your laptop/computer - **you are now able to make Zoom full screen once again.**

You may wish to vote using a smartphone or tablet device as that may be easier than having a separate tab open on the larger device you are using to view the meeting.

Using the device you plan to vote with, please click on the link in the email or copy it into your web browser (e.g. Internet Explorer, Google Chrome). You can then continue with the meeting ID and personal details as before.
