

HEARING YOUR VIEWS ON STEWARDSHIP

Here at the Church of England Pensions Board we take great care to ensure your pension is invested well - and sustainably - to secure your future.

We are active stewards of the funds you entrust to us. This means we use our voice and work with others to advocate for change within companies and across industries on issues that matter to our members including climate change, diversity, indigenous rights, labour rights, and mining safety.

We publish an annual [Stewardship](#) report that sets out how we invest and engage on these important topics on your behalf.

Last's year report is available at www.churchofengland.org/cepb

We want to hear your views on this report and how your pension is invested responsibly for the future.

How to get involved

Please join one of our two focus groups later this year to give your views on the latest Stewardship report.

Planned dates

Wed 26 Oct 2022

4-5pm

Wed 2 Nov 2022

9-10am

Both sessions will be held online.

What's involved?

We will ask you to read the report, watch a short video on key highlights and share your views on:

- Was it easy to read and understand?
- Did you get a sense of the impact the money invested to pay for your pension has, in driving change in the world now?
- What would you like to see covered in the Stewardship report in the future?

To register for a member focus group please email:
